Fact Sheet

Terracare Associates LLC

Terracare Associates is one of the leading landscape and public infrastructure maintenance contractors in the Western United States. The company provides landscape maintenance and public works services to wide variety of clients. We service both a variety of premier commercial properties and municipal agencies with experienced, highly trained, professional team leaders and neat, uniformed crews.

History

- 1985 - The company began as the landscape maintenance division of Randall, Blake, Inc. (RBI) with a single crew led by Todd Williams. The first landscape maintenance contract with Pulte Homes, Inc. is to maintain the landscape for Heartwood Townhomes in Lafayette, CO.
- 1996 - Randall, Blake, Inc acquires Contra Costa Landscape expanding the company's business in Northern California.
- 1998 The Public Infrastructure Maintenance Group is formed to provide public works maintenance services for the newly constructed toll way – E-470 in Denver, CO.
- 2002 – The company becomes American Civil Constructors (ACC).
- 2008 – American Civil Constructors acquires Perry Lake Management to expand the business into lake management services.
- 2009 – The Landscape and Public Works Maintenance Divisions become independent of ACC under the new brand, Terracare Associates.
- 2011 – The company serves over 400 diverse clients, many with multiple properties, and has grown to over 400 employees.

Company Profile

Our Responsibility

Terracare Associates believes that it is our responsibility to be stewards of our local environment while protecting the health, safety and welfare of our communities, clients and staff. Dedication to our clients and the industry has allowed Terracare Associates to lead the industry in improving outdoor environments for more than 25 years. Our commitment to excellence, competitive pricing and knowledgeable staff, places Terracare Associates at the top of the landscape management industry. Everything we do is grown out of our core values. These values ensure that our culture, the growth of our company and our message to the customer is focused on leadership, integrity, value and active participation in our environment.

Background

Terracare Associates was born out of a vision that Todd Williams had to start a landscape maintenance division while working as a construction manager for Randall, Blake, Inc. He began with one simple idea; to provide long-term high quality landscape maintenance services to clients that RBI had built projects for in the past. As a result, what started out as a determined young man, some basic landscape maintenance equipment and a dream has developed into the company that exists today.

In 1985, Todd Williams began providing landscape maintenance services to commercial clients and growth came quickly. After the first year, well over one hundred clients were being served, setting the stage for rapid annual growth. In 1998, the company began its first venture into public works maintenance with the completion of Colorado's first toll road – E470. The strategy developed as a result of the toll way's need for adequate maintenance services at the conclusion of the construction in an unincorporated part of the Denver area. Then in 2008, the company became involved in the privatization of the public works services for the City of Centennial, CO which is the largest transition from public sector to private enterprise in the United States to date. Since then, the company has continued to grow its landscape maintenance and public infrastructure maintenance opportunities. In May of 2009, the company re-branded itself as Terracare Associates.

The last 25 years have seen significant growth and change at Terracare Associates. In 2010, the company bolstered its position as a leader in the industry by re-organizing its operations business and improving its focus on customer service and business development, a move that proved successful as the industry struggled in a post 9-11 environment. Since then, the company has implemented a safety training program, expanded the plant health maintenance team, grew its management team to include IT, human resources, sales, and marketing professionals and established a distinct company culture. Today the company has grown to over 400 employees.

Key Points about Terracare Associates

Our goal of leading the outdoor industry in developing sustainable environments, is achieved through creating accountability at every level based on the principles of leadership, integrity, value and environment that drive our organization. Terracare Associates holds itself to a high level of accountability and professional conduct, not only to our clients, but also to one another. We generate respect from each team member through the sharing of knowledge and ongoing training programs. These ongoing efforts are translated directly into our dedication to customer service, prompt and courteous communication, and our high level of craftsmanship.

Key People

Dean Murphy

President

Mr. Murphy has over twenty-five years experience in the construction industry. His ability to quickly assess the needs of clients and staff as well as a deep knowledge of construction implementation and successful management techniques make him an invaluable component of the Terracare Associates team. Mr. Murphy has also served the community in various volunteer and chamber of commerce positions. He enjoys bow hunting, salt water fishing, and spending time with his family. Mr. Murphy is also known to be quite the gourmet chef.

Education

David Lipscomb University – Bachelor in Science, Management; Minor Marketing

Bill Horn

Vice President/HR Manager

Mr. Horn has thirty-two years of experience in the Landscape Management Industry. Mr. Horn specializes in technical field expertise and customer service. Mr. Horn is also very involved in Resource Management and the implementation of Sustainable Landscape Management practices. Mr. Horn currently serves on the Board of Directors for the Professional Landcare Network. He has also authored multiple magazine and newspaper articles on Landscape Management best practices. Mr. Horn enjoys hiking, backpacking and cultivating his edible landscape at his own home.

Education

Solano College – Agriculture Business

Parry Webb

Director of Sales and Business Development

Mr. Webb has over twenty-five years experience in the landscape industry. He has an extensive background in irrigation product development, irrigation design and innovative water management systems. His involvement in sustainable irrigation practices including centralized control systems, irrigation efficiency, and water harvesting make Mr. Webb a valuable asset to the Terracare Associates team. Mr. Webb spent twelve years at Rain Bird Corporation where he oversaw divisional sales development. He is passionate about water conservation and sustainability. Mr. Webb enjoys playing guitar with his daughter, family camping, backpacking, hiking and traveling, and is known for being quite the gardener.

Education

Vanguard University – Bachelor of Arts Social Science; Minor, Political Science

Brent Trujillo

Operations Manager – Landscape Maintenance (Colorado)

Mr. Trujillo has been with Terracare Associates for the past six years. Mr. Trujillo currently manages all of our Colorado maintenance operations. His ability to motivate his staff through creating a positive workplace while at the same time growing the business has made him an indispensable part of the Terracare Associates family. Through his successful development of the South West Metro division, Mr. Trujillo's responsibilities have been extended into the procurement and retaining landscape, irrigation and renovation management projects as well as the overall management of the Colorado maintenance team. Mr. Trujillo's attention to detail and focused management style has allowed for not only his success, but to the success of the overall company. Mr. Trujillo spends his free time enjoying camping, fishing, and gourmet cooking.

Justin Stewart

Operations Manager – Public Infrastructure Maintenance

Mr. Stewart has been with Terracare Associates, formerly American Civil Constructors, ACC for the past thirteen years. Mr. Stewart currently manages our public infrastructure division and is responsible for securing and retaining public works and infrastructure projects as well as the overall management of a sixty person team. Mr. Stewart's attention to detail and focused management style has allowed the division to be a success. Mr. Stewart enjoys horseback riding, vacationing, playing in the mountains, and long walks on the beach.

Education

Temple University – Landscape Architecture and Horticulture

- Qualified Supervisor – Colorado Department of Agriculture, Categories 107, 206, 207
- Certified Turfgrass Professional (Professional Landcare Network)
- Landscape Industry Certified Technician (Professional Landcare Network)
- Landscape Industry Certified Manager (Professional Landcare Network)
- Professional Landcare Network, STARS, Safety Program Member
- Water Management Technician (California Landscape Contractors Association)
- Certified Landscape Irrigation Auditor (Irrigation Association)
- Certified Irrigation Contractor (Irrigation Association)
- EPA WaterSense Partner
- CE-MAGIC Recertification and Technician Program
- Certified Pesticide Applicator
- Pesticide Control Advisor
- Certified Arborist
- Class A Golf Course Superintendant
- Trench Shoring Services Certification
- American Back flow Prevention Association Tester Certification
- Colorado Department of Transportation Erosion Control Supervisor
- Traffic Control Supervisor
- Licensed California Landscape Contractors (C-27)
- Aquatic Biologist
- Certified Professional in Erosion and Sediment Control

When it comes to all matters related to landscaping and public works maintenance, the Terracare Associates team is ready to assist. Our experts are a great source for practical information, industry trends, environmental issues, stories and related topics. Here are just a few of the topics they can address:

Landscape Topics

- Sustainable Management Planning - We can help you create a Management Plan to provide a strategy for becoming more sustainable on a project and how being environmentally responsible can save landscape budget dollars.
- Plant Health Care – Our licensed Plant Health Care Managers use safe, high quality, slow release fertilizers to reduce runoff of nitrogen and to reduce frequencies of fertilizer application. Alternatively we can develop biofertility programs – which use living microorganisms to enhance the soil structure – which can reduce the need for pesticide use on the lawns and plant material.
- Water Conservation – Our highly-trained irrigation technicians can evaluate and recommend changes to your current irrigation system to maximize system efficiency and reduce landscape water use. For example, by installing a “smart controller”, converting spray heads to drip and changing out some sprinkler equipment you can save 30 percent of your water use on average.
- Turfgrass and Native Plant Renovation – We assist many of our clients in renovating their sites by designing and installing a more sustainable landscape with water conscious yet aesthetically beautiful plant materials.

- Edible Landscapes – By converting turfgrass or shrub bed areas to a useable, interactive edible landscape, you can transform your landscape into a habitat that engages the local wildlife and provides a focal point for sustainable discussions.
- Water Harvesting – Our irrigation technicians can evaluate current landscape water resources and develop plan to switch irrigation water source to an alternative resource including water harvested from rainwater, HVAC condensate, cooling tower discharge, and Greywater. These solutions include collection of these resources into cisterns, storage tanks, rain gardens and bio-swales.
- Permeable Hardscape – We offer solutions to install permeable paving materials to reduce stormwater runoff and all rain water to infiltrate into the ground and replenish ground water rather than running into the stormwater run-off system. Install permeable paving materials to reduce stormwater runoff and all rain water to infiltrate into the ground and replenish ground water rather than running into the stormwater run-off system.
- Energy Saving Landscape – We can help you create energy saving landscapes that place the proper variety of trees for shade and create wind breaks.

Public Infrastructure Topics

- Public Infrastructure Topics here - We can help you create a Management Plan to provide a strategy for Municipal Snow Removal – We can help you create a storm management plan that includes information on pre, during, and post storm management as well as cost and materials tracking solutions and blizzard event plans for municipalities of any size. Storm plans are necessary for any entity looking to manage costs and provide a high level of service to their citizens.
- Roadway Management – Our staff can assist with developing long-term cost saving roadway maintenance plans that provide both scheduled and non-scheduled maintenance. Solutions for all types of roadways and levels of maintenance including toll roads, bridges, and highways.
- Municipal Public Works Maintenance Management – Our public works experts can help you craft a “City Wide” maintenance plan that addresses all of the issues pertinent to your community. Areas that are addressed include roadway, right-of-way, snow removal, storm and disaster maintenance and even animal and vagrant clean-up. Let our experienced staff create a customized plan to keep your municipality maintenance running smooth and looking its best.
- Native Vegetation Management Plans – We can help you to create a customizable plan to keep your native vegetation and pests from over populating your community. Our certified herbicide applicators and native mowing experts can assist you in developing mowing and application strategies that will reduce your pest population as well as the habitat they thrive in.
